Reviewer A:

The subject and paper is interesting, however, authors need to improve the quality little bit more, here are some comments to be implemented:

1. Please mention in your methodology about "measures" or measurements that you have used, e.g. from where you got the questionnaires, which studies, how did you develop research tool and used it for analysis, how many indicators or items.
2. Please fix tables to be more clearer for understanding, they should be the same style
3. (Results) you should check your sub-titles numbering, you don't need to make 5 numbers on sub-titles
4. you may add the theoretical and practical implications for your paper
5. you need to support your discussion with up to date researches, here are some references you are recommended to use them to improve the novelty or literature review and your discussion,
 - [Investigating Characteristics of Learning Environments During the COVID-19 Pandemic: A Systematic Review](#)
 - [Impact of covid-19 pandemic on the global economy and future prospects: A systematic review of global reports](#)
 - [Students anxiety and recruitment during COVID-19 pandemic: Role of university, specialization and employment expectation](#)
 - [Integration of ICT in higher education during Covid-19 pandemic: a case study](#)

Reviewer B:

- 1) Please add the theorethical background to build the conceptual framework and hyphotheses
- 2) Please add the theorethical as well as adding the previous research (in sub categori : finding, discussion and conclusion)
- 3) use the mendeley for the references
- 4) Please add the implication for future research
