Kepada: adhi adhi - kusmantoro <adhiteknik@gmail.com>

The following message is being delivered on behalf of Indonesian Journal of Electrical Engineering and Computer Science.

- 
- IJEECS for writing format and style: <https://iaescore.com/gfa/ijeecs.docx>
  - Research paper: min 25 references primarily to journal papers
  - Review paper: min 50 references primarily to journal papers
  - Similarity score of your manuscript must be less than 25%
- 

Dear Prof/Dr/Mr/Mrs: adhi adhi - kusmantoro,

Thank you for submitting the manuscript, "Power Management On DC Microgrid With New DC Coupling Based On Fuzzy Logic" to Indonesian Journal of Electrical Engineering and Computer Science. With the online journal management system that we are using, you will be able to track its progress through the editorial process by logging in to the journal web site:

Manuscript URL:

<https://ijeecs.iaescore.com/index.php/IJEECS/author/submission/32928> <- It is your paper ID!!

Username: upgris

Please take a look at:

<http://ijeecs.iaescore.com/index.php/IJEECS/about/editorialPolicies#custom-4>.

Before review process, please re-upload your revised paper as "author version" as soon as possible by considering the checklist for avoiding delay on review process.

Thank you for considering this journal as a venue for your work.

Best Regards,

Prof. Dr. Seifedine Kadry

Indonesian Journal of Electrical Engineering and Computer Science

NOTE:

-- A single author is NOT preferred in this journal, except come from qualified researcher (min WoS/Scopus h-index: 15). We would like to publish high quality papers of a research group.

-- Paper with single author normally will be REJECTED

---

For ORIGINAL/RESEARCH PAPER, the paper should be presented with IMRaD model:

1. Introduction (I)
2. The Proposed Method/Algorithm/Procedure specifically designed (optional).  
Authors may present complex proofs of theorems or non-obvious proofs of correctness of algorithms after introduction section (obvious theorems & straightforward proofs of existing theorems are NOT needed).
3. Method (M)
4. Results and Discussion (RaD)
5. Conclusion.

A high quality research paper MUST has:

- (1) a clear statement of the problem the paper is addressing;
- (2) the proposed solution(s); and
- (3) results achieved. It describes clearly what has been done before on the problem, and what is new.

The goal of this revision is to describe NOVEL TECHNICAL RESULTS. There are four (4) types of technical results:

- (a) A theory: consisting of a collection of theorems.
- (b) An algorithm/method/approach/framework/ .... ;
- (c) A system construct: such as hardware design, software system, protocol, etc.; The main goal of your revised paper is to ensure that the next person who designs a system like yours doesn't make the same mistakes and takes advantage of some of your best solutions. So make sure that the hard problems (and their solutions) are discussed and the non-obvious mistakes (and how to avoid them) are discussed.
- (d) A performance evaluation: obtained through analyses, simulation or measurements;

Please state your technical result (one of the four types of technical results above) in your paper.

We will usually expect a minimum of 25 references primarily to journal papers, depending on the length of the paper (number of minimum references =  $2n+10$ ,  $n$ =page length). Citations of textbooks should be used very rarely and citations to web pages should be avoided. All cited papers should be referenced within the text of the manuscript.

---

For REVIEW PAPERS, the paper should present a critical and constructive analysis of existing published literature in a field, through summary, classification, analysis and comparison. The function and goal of the review paper is:

- 1) to organize literature;
- 2) to evaluate literature;
- 3) to identify patterns and trends in the literature;
- 4) to synthesize literature; or
- 5) to identify research gaps and recommend new research areas.

The structure of a review paper includes:

1. Title – in this case does not indicate that it is a review article.
2. Abstract – includes a description of subjects covered.
3. Introduction includes a description of context (paragraph 1-3), motivation for review (paragraph 4, sentence 1) and defines the focus (paragraph 4, sentences 2-3)
4. Body – structured by headings and subheadings
5. Conclusion – states the implications of the findings and identifies possible new research fields
6. References (“Literature Review”) – organised by number in the order they were cited in the text.

Number of minimum references for review paper is 50 references (included minimum 40 recently journal articles).

The following message is being delivered on behalf of Indonesian Journal of Electrical Engineering and Computer Science.

---

-- Paper ID# 32928

-- Authors must strictly adhere to the guide for authors, MS Word:

<http://iaescore.com/gfa/ijeecs.docx>; LaTeX format:

<http://iaescore.com/gfa/ijeecs.rar>

-- Research Paper: min 25 references (primarily to journal papers) and

Review/study/survey Paper: min 50 references (primarily to journal papers)

---

Dear Prof/Dr/Mr/Mrs. Adhi Kusmantoro,

We have reached a decision regarding your paper submission entitled "Power Management On DC Microgrid With New DC Coupling Based On Fuzzy Logic" to Indonesian Journal of Electrical Engineering and Computer Science, a Scopus indexed journal (SJR 2017: 0.182, Q3 on Electrical and Electronic Engineering, Q3 on Computer Networks and Communications, Q3 on Hardware and Architecture, Q3 on Signal Processing).

Our decision is: Revisions Required.

For research paper, it is mandatory to present your final paper according to "IMRaDC style" format, i.e.:

1. INTRODUCTION (I)
2. The Proposed Method/Algorithm/Procedure specifically designed (optional)
3. METHOD (M)
4. RESULTS AND DISCUSSION (RaD)
5. CONCLUSION (C)

Authors should have made substantial contributions. Read the checklist for preparing your paper for publication at:

<http://ijeecs.iaescore.com/index.php/IJEECS/about/editorialPolicies#custom-5>.

Please try to follow the format as closely as possible. Please submit your revised paper in MS Word file format (or LATEX source files; ZIP your files

if you present your paper in LaTeX), refer materials at:  
<https://bit.ly/35R6JTs> and <https://bit.ly/2DxU9MI> for further guidelines,  
and submit revised paper within 8 weeks through our online system at same ID  
number (NOT as new submission) on Tab "Review" as "Author Version" file.

Then, your revised paper will be judged for final decision of acceptance or  
rejection.

I look forward for hearing from you

Thank you

Best Regards,  
S. Kadry

----- EDITOR COMMENTS -----  
-----  
-----

**YOU MUST DO IT!!!**

Please prepare your revised paper by doing your best to avoid any delay for  
publication!!!

- 1). PLEASE ADHERE STRICTLY THE GUIDE OF AUTHORS  
<http://iaescore.com/gfa/ijeecs.docx> (Use this file as your paper template!!)
- 2). Add biographies of authors as our template (include links to the 4  
authors' profiles, do not delete any icons in the template). Provide links  
for all authors to the 4 icons (Scholar, Scopus, Publons and ORCID). It is  
mandatory!!
- 3). Because tables and figures supplement the text, all tables and figures  
should be referenced in the text. Avoid placing figures and tables before  
their first mention in the text. Authors also must explain what the reader  
should look for when using the table or figure. Focus only on the important  
point the reader should draw from them. Use different PATTERNS (instead of  
ONLY different colors) for presenting different results in your  
figures/graphics. Prepare all your tables strictly adhere the guidelines (do  
NOT as figure).
- 4). Please ensure that all references have been cited in your text. Use a  
tool such as EndNote, Mendeley, or Zotero for reference management and  
formatting, and choose IEEE style. Each citation should be written in the

order of appearance in the text in square brackets. For example, the first citation [1], the second citation [2], and the third and fourth citations [3], [4]. When citing multiple sources at once, the preferred method is to list each number separately, in its own brackets, using a comma or dash between numbers, as such: [1], [3], [5]. It is not necessary to mention an author's name, pages used, or date of publication in the in-text citation. Instead, refer to the source with a number in a square bracket, e.g. [9], that will then correspond to the full citation in your reference list.

Examples of in-text citations:

This theory was first put forward in 1970 [9].

Zadeh [10] has argued that ...

Several recent studies [7], [9], [11]-[15] have suggested that....

... end of the line for my research [16].

5). Please present all references as complete as possible and use IEEE style (include information of DOIs, volume, number, pages, etc). If it is available, DOI information is mandatory!! See <http://iaescore.com/gfa/ijeecs.docx>

## Comments from editor

1. Please Adhere Strictly The Guide Of Authors

### Response for #1 comment:

Thank you, We have improved the article according to templates and guidelines

2. Add biographies of authors as our template (include links to the 4 authors' profiles, do not delete any icons in the template). Provide links for all authors to the 4 icons (Scholar, Scopus, Publons and ORCID). It is mandatory!!

### Response for #2 comment:

Thank you, We've improved the article by adding links for all authors which includes Scopus, Scholar, Orcid, and Publons.

3. Because tables and figures supplement the text, all tables and figures should be referenced in the text. Avoid placing figures and tables before their first mention in the text. Authors also must explain what the reader should look for when using the table or figure. Focus only on the important point the reader should draw from them. Use different PATTERNS (instead of ONLY different colors) for presenting different results in your figures/graphics. Prepare all your tables strictly adhere the guidelines (do NOT as figure).

### Response for #3 comment:

Thank you, We've rearranged the layout of the figures and tables to make it easier for readers to understand the article.

4. Please ensure that all references have been cited in your text. Use a tool such as EndNote, Mendeley, or Zotero for reference management and formatting, and choose IEEE style. Each citation should be written in the order of appearance in the text in square brackets. For example, the first citation [1], the second citation [2], and the third and fourth citations [3], [4]. When citing multiple sources at once, the preferred method is to list each number separately, in its own brackets, using a comma or dash between numbers, as such: [1], [3], [5]. It is not necessary to mention an author's name, pages used, or date of publication in the in-text citation. Instead, refer to the source with a number in a square bracket, e.g. [9], that will then correspond to the full citation in your reference list.

### Response for #4 comment:

Thank you, We have used delay in reference management and choose IEEE style. All citations are written in the order they appear in the text in square brackets. When citing multiple sources at once, the method we use is to list each number separately, in their respective brackets, using hyphens between numbers.

5. Please present all references as complete as possible and use IEEE style (include information of DOIs, volume, number, pages, etc). If it is available, DOI information is mandatory!

### Response for #5 comment:

Thank you, We have presented all references in IEEE style. In the reference there is also information on DOI, volume, number, page, year.

# Review Form

## Comments from reviewer

6. The template of paper needs a double check to follow all preparation rules and requirements rigidly.

**Response for #6 comment:**

Thank you, We've checked articles by writing following templates and guidelines

7. Abstract at least min 100 words and max 200 words. start with an introduction, then highlight the issue, followed by objective, then methodology used, finally findings.

**Response for #7 comment:**

Thank you, We have improved the abstract to 186 words according to the 200 word maximum guideline. The abstract begins with the problems, objectives, methods and results of the study.

8. Figure 5 is not mentioned in the body text. Please mention this figure.

**Response for #7 comment:**

Thank you, We have provided an explanation of Figure 5 on page 6 in the article. Figure 5 shows the modeling of the proposed DC microgrid configuration.

9. Please provide all authors' email addresses and their links of the researchers social media accounts as complete as possible: Scopus, ORCID (required), Google Scholar, Clarivate (if any).

**Response for #7 comment:**

Thank you, We have improved the article by providing all author email addresses and adding Scopus, Orcid, Google Scholar and Publon links. We added it in the author's biography

=====

Dear Prof/Dr/Mr/Mrs: Adhi Kusmantoro,

It is my great pleasure to inform you that your paper entitled "Power Management On DC Microgrid With New DC Coupling Based On Fuzzy Logic" has been initially ACCEPTED and will be PUBLISHED on the Indonesian Journal of Electrical Engineering and Computer Science, a Scopus (<https://www.scopus.com/sourceid/21100799500>) and ScimagoJR (<https://www.scimagojr.com/journalsearch.php?q=21100799500&tip=sid&clean=0>) indexed journal. Congratulations!

Please submit your below documents within 30 days to [ijeecs.iaes@gmail.com](mailto:ijeecs.iaes@gmail.com)

1. Final camera ready paper (in MS Word file format, or LaTeX source files)
2. Similarity report checking (that the result is below 25%, uses software such as iThenticate or Turnitin), and
3. Payment evidence

**Your paper will be published after fulfilling all requirements for publication (strictly follow the guidelines at <http://ijeecs.iaescore.com/index.php/IJEECS/about/editorialPolicies#custom-5>). The presentation of the simulation and/or experimental setup (in the Method section) must be clear and complete in every detail facilitating reproducibility by other scientists. Present a picture of your simulation and/or experimental setup and describe your work clearly. For your information, according to international regulations, the similarity score of camera-ready paper should be less than 25%. A single author is NOT acceptable, and will never publish in this journal. The editor(s) will decide whether or not your camera-ready paper is complete and meets the final guidelines. Please present each reference as completely as possible while adhering to IEEE style (including volume, number, pages, and DOIs).**

When you send in all of the above documents and your final paper follows all of the final instructions, your paper will be judged "fully accepted." It will be the date of your paper's acceptance.

We are looking forward to hearing from you

In order to cover part of the publication cost, each accepted paper is charged USD 315. This charge is for the first 8 pages, and any published manuscript over 8 pages will incur extra charges of USD 50 per page. Indonesian authors should transfer IDR instead of USD. (Please refer to <https://www.xe.com> for the exchange rate.) We value collaborative papers and do not value papers with a single (sole) author. Papers with a single author will be rejected (or, if very good, will be considered for publication but will be charged twice the above fee: USD 530, and any published manuscript with more than 8 pages will incur additional charges of USD 100 per page).

The payment should be made by bank transfer (T/T):
